

# Pierre DUGUE

01/12/2015

French Software engineer

Phone : 0 426 538 079

Email : pierre.dugue1@gmail.com

Github : <https://github.com/PierreDugue>

## PERSONNAL ATTRIBUTES

- Web development in front-end and back-end
- Unitary, technical and functional test (writing test plans)
- Good communication skills
- Good understanding of User Experience focused on web standards
- Experience with version control systems (Git and SVN)
- Good knowledge of Responsive Design and its implementation across browsers and device
- Advanced knowledge and literacy in HTML and CSS

## TECHNICAL SKILLS

- **Java/J2EE** with frameworks Spring (a model-view-controller framework, that provides a comprehensive programming and configuration model for modern Java-based enterprise applications) and hibernate (an object relation mapping)
- **Javascript/JQuery** (cross-platform JavaScript library designed to simplify the client-side scripting of HTML.)
- **HTML/CSS, Thymleaf** (Template engine capable of processing and generating HTML, XML, JavaScript, CSS and text, and can work both in web and non-web environments)
- **AngularJS**: I don't have professional experience, but did many tutorials and minors personal project. This is a technology that really interest me, and want to progress on it.
- **Bootstrap**: free and open-source collection of tools for creating websites and web applications.
- **MySQL, OracleSQL**
- **Gradle, Maven**: open source build automation system
- **Git, svn** : version control system for software development.
- **Photoshop CS5/6**

## EMPLOYMENT HISTORY

March 2014 - October 2015: Consultant for DOCAPOST (Digital arm of LA POSTE group. DOCAPOST propose a range of offer for the managing of professional document exchange.)

Working on several from scratch projects:

- MGEN: big health care project in Java/J2EE and Liferay with a team of 15 peoples. Implementation of major functionalities in backend and frontend.
- LR COPRO: electronic registered letters application in Java/J2EE. I was in charge of both front-end (responsive design using Bootstrap 3 and Thymeleaf) and back-end (using Java/J2EE, with Spring 3, Hibernate and SpringBoot) in a team of 3 peoples. I participated to several meetings with the client to help them to define their needs. I helped to wrote technical and functional specifications.
- NEWTON (2months): Successfully developed a proof of concept with an 8 people team for a connected objects project in Java/J2EE and Grails.
- LR COPRO: electronic registered letter application intended to condominium association in order to send massive quantities of emails to owners.

February 2011 - March 2013: Consultant for CAPGEMINI (**Cap Gemini** is a French multinational management consulting corporation headquartered in Paris, France. It provides IT services and is one of the world's largest consulting, outsourcing and professional services companies with 180,000 employees in over 40 countries)

- Working on a Tierce Maintenance Applicative (TMA) for VIRBAC (**Virbac** is a French company dedicated exclusively to animal health). My role was to debug several applications from different technologies such as Java/J2EE, Lotus Script and Windev.
- Customer relationship management: Elaborate evolutions for existing applications with the client. Keep the client aware of the progression.
